ProPTT2 can change your business.

When managing between site and office using walkie-talkie devices;
Additional cost and management of radios,
Communication limits due to shaded area and distance range

Introduce ProPTT2 Server/Cloud Service, ProGate

**No need to carry a walkie-talkie in the office,
Communication available between walkie-talkie and smartphone
even in areas outside the radio range**

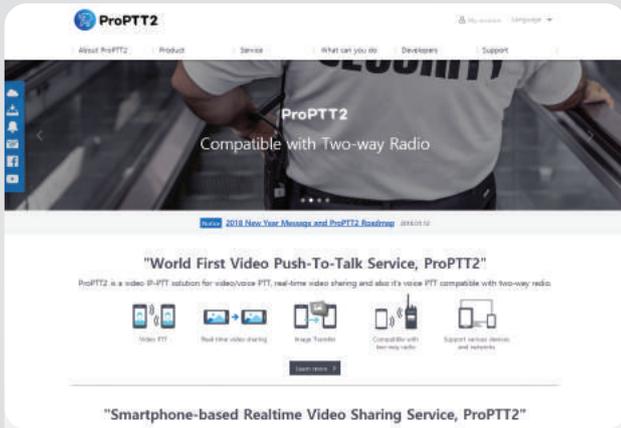

When transport companies communicate using a walkie-talkie;
Only possible to talk only within the radio range,
Administrator/Manager difficult to control the entire users and system

Introduce ProPTT2 Server/Cloud Service

**Reduced transceiver purchase cost,
Available to check users location info via the Admin Web
Real-time Video/Audio Push-To-Talk in case of an accident**

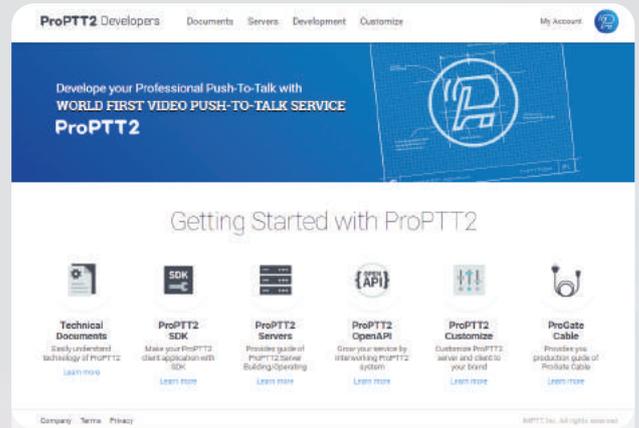

Visit ProPTT2 website for more information.
